

# DAVID JONES

## What does the green and amber tick indicate?

When searching for items you will see that the search results will show the status of an item.

The status of this item is amber this means it is either in your workflow waiting to be enriched or with the DJs internal team to be approved. (DJs mech team approves item enrichment and DJs digital team approves asset management).

If the status is green it means that the item is in the product catalogue which could mean 2 things:

- Either the item has not begun its item enrichment and asset management journey or
- Item enrichment and asset management has been completed and item is live.
