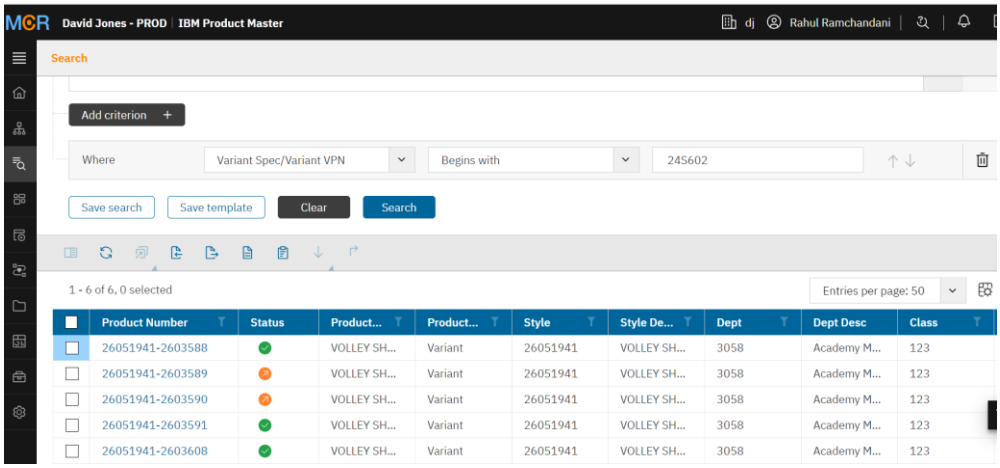
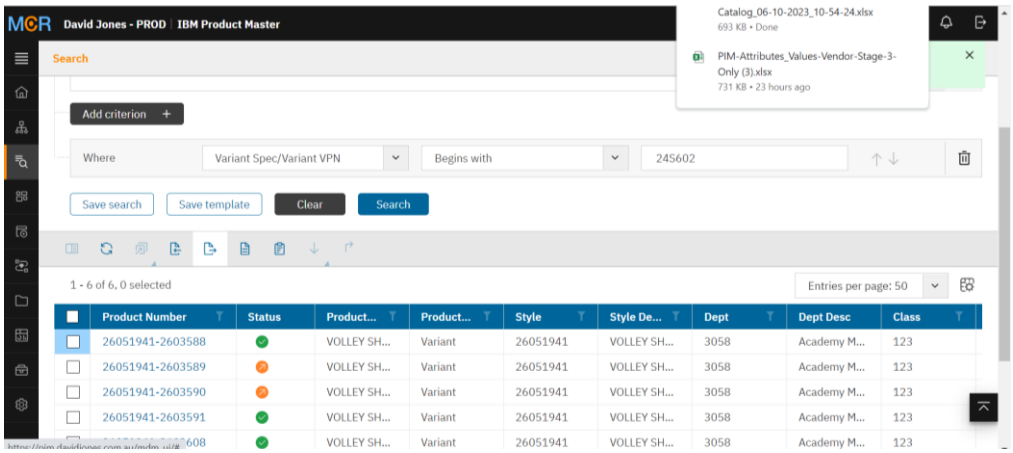
# Exporting items from search is not resulting in export of all the items?

When you search for items and try to export them, items with a green status only get exported

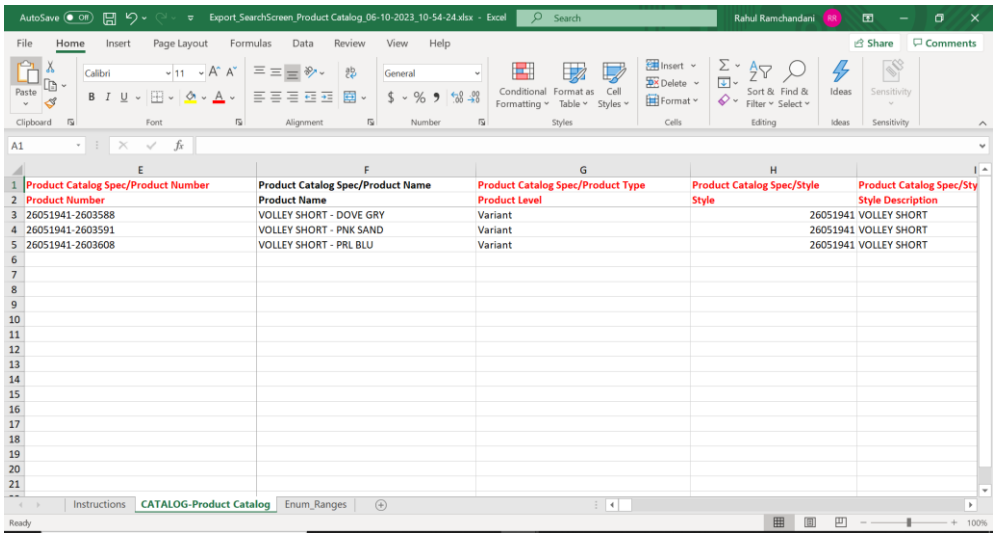
For instance, in the following case, after a search query has been executed, you can see the following results.



If we click on the export icon, ideally all the items shown in the list should be exported.



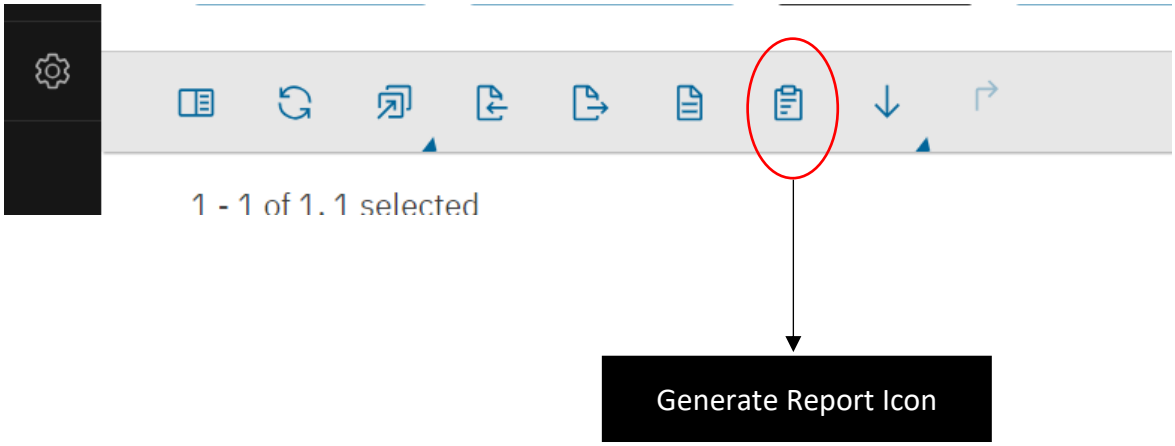
But when we open the excel sheet, we can see that the items with a green status have been exported.



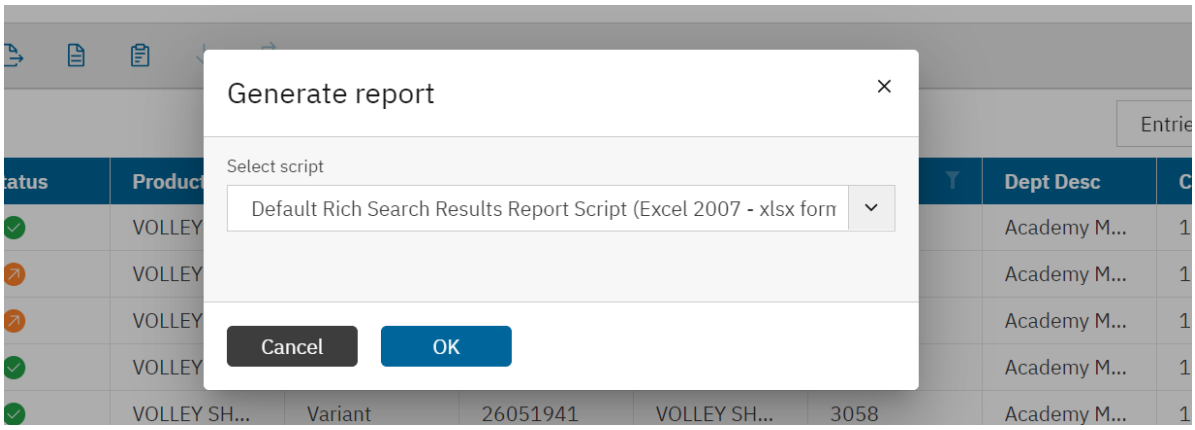
| | E | F | G | H | I |
|---|---|---|---|---|---|
| 1 | Product Catalog Spec/Product Number | Product Catalog Spec/Product Name | Product Catalog Spec/Product Type | Product Catalog Spec/Style | Product Catalog Spec/Sty |
| 2 | Product Number | Product Name | Product Level | Style | Style Description |
| 3 | 26051941-2603588 | VOLLEY SHORT - DOVE GRY | Variant | 26051941 | VOLLEY SHORT |
| 4 | 26051941-2603591 | VOLLEY SHORT - PNK SAND | Variant | 26051941 | VOLLEY SHORT |
| 5 | 26051941-2603608 | VOLLEY SHORT - PRL BLU | Variant | 26051941 | VOLLEY SHORT |

How do we get a list of all the items including items that have an amber status?

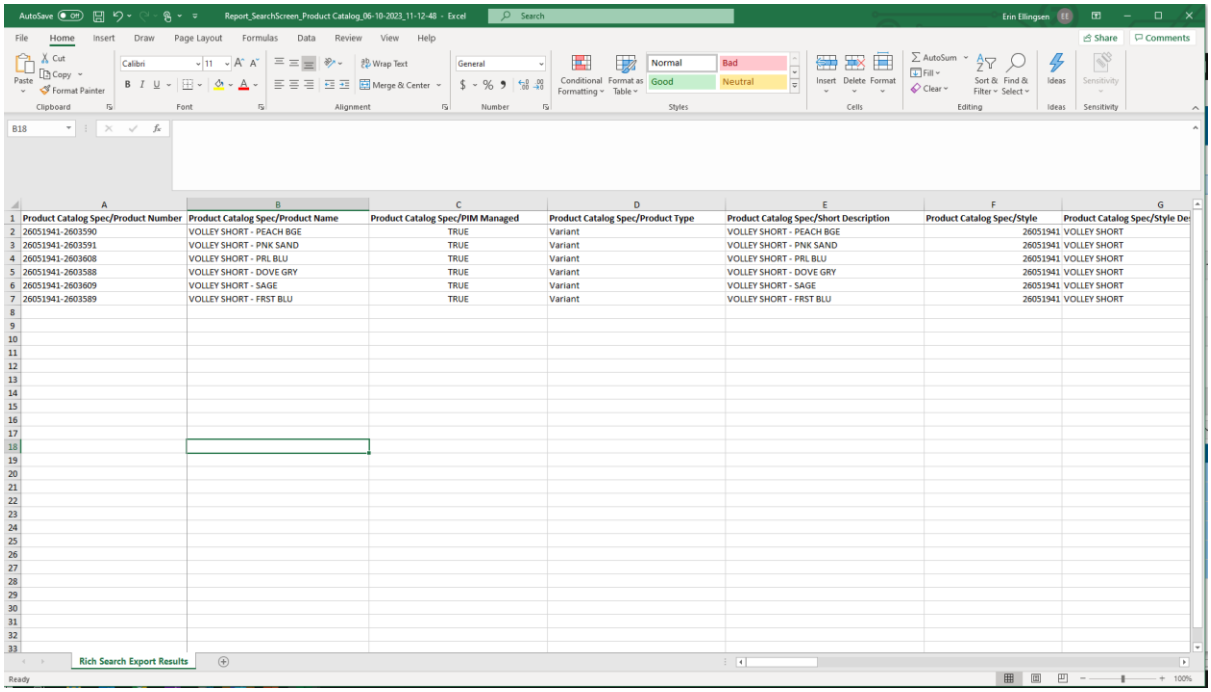
Instead of clicking on the export icon, click on the ‘Generate Report’ icon



You will get a dialog box asking you to pick a format of your choice. The default format is xlsx (excel). Click on ‘OK’.



An excel file will be downloaded



You can see here that all the variants have been downloaded.
