

DAVID JONES

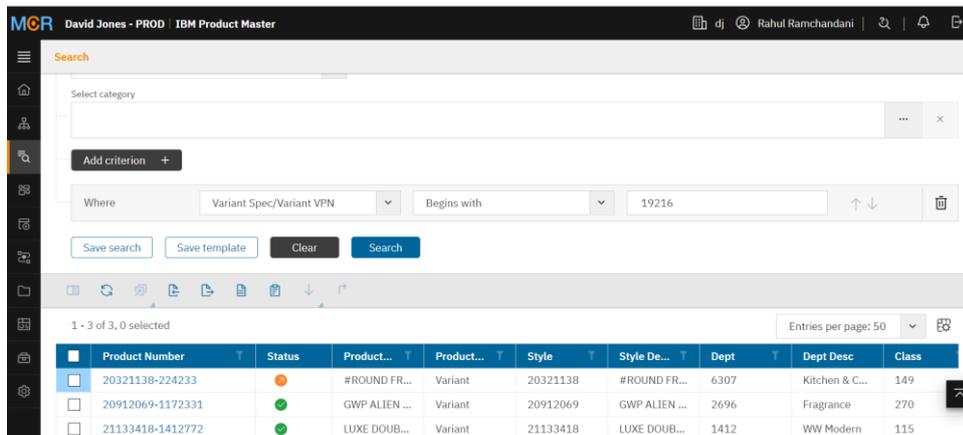

How can I see if my assets have been successfully updated?

Once you have uploaded the images and product copy and clicked on Done, variants will not be visible in your workflow anymore. To check if the images have been uploaded correctly, follow the steps as shown below:

Step 1 – Click on the search icon

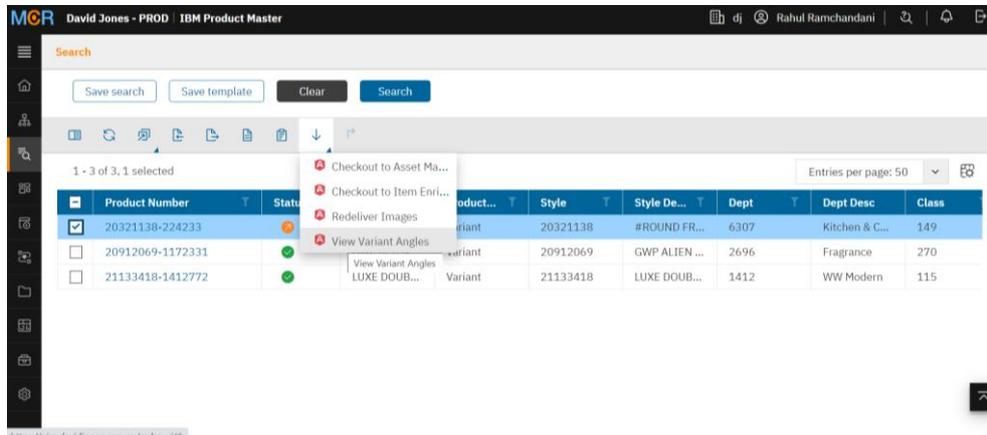

Step 2 – Search for the item using the Vendor Product Number (VPN) at a variant level.

DAVID JONES

Step 3 – Select the item and click on ‘view variant angles’

Step 4 – Check if the images have been loaded correctly.
