

# DAVID JONES

## Why are my styles sitting in item collation?

Item collation is a buffer space. Items pass through the item collation when moving from Step 1 -: Validate Family Channels to Step 2 -: Enrich Style or moving from Step 2 -: Enrich Style to Step 3 -: Enrich Variant.

Step	Count
Enrich Mindfully Made Attributes	0
Enrich Style	6
Enrich Variant	11
<b>Item Collation</b>	<b>10</b>
Rejected Variants	1
Validate Family-Channels	0

If items land up in the item collation step do not move them manually, this is an automatic process. If you try to move them manually, they will not move.
